PROFESSIONAL PROFILE

Actuarial professional (ITAM) with hands-on experience in credit risk, financial modeling, and Python-driven process automation. Built end-to-end tools ranging from SAT (CFDI) data extraction pipelines to credit pre-qualification models and financial projections. Seeking a hybrid finance-data role to apply and grow skills in advanced analytics, ML, and applied AI.

WORK EXPERIENCE

Senior Credit Analyst — **Creze** Feb 2025 – Aug 2025

- Designed a credit pre-qualification model (Excel + Python) integrating CFDI data, bank statements, business tenure, and credit bureau history to automatically determine eligible loan amounts.
- Built a Python pipeline for automated extraction and cleaning of SAT XML files, reducing analysis turnaround from 72 to 48 hours (~33%).
- Developed a financial model converting CFDI and bank data into approximate income statements, calculating key ratios (DSCR, coverage, liquidity) and generating income/cost projections.
- Managed 6 daily credit files maintaining competitive response times in the fintech SME lending market.

Credit Risk Analyst — **Quantum FL** Sep 2022 – Oct 2023

- Analyzed financial statements, electronic invoicing, and credit history to assess repayment capacity of applicant companies.
- Built Excel-based financial models for projections and scenario analysis (optimistic, base, stress).
- Partially automated data collection and structuring processes, improving analysis consistency.
